XIAN LIANGJIATAN INTERNATIONAL SCHOOL

2. Establish a school epidemic prevention and control support team and improve the campus epidemic prevention and control methods.

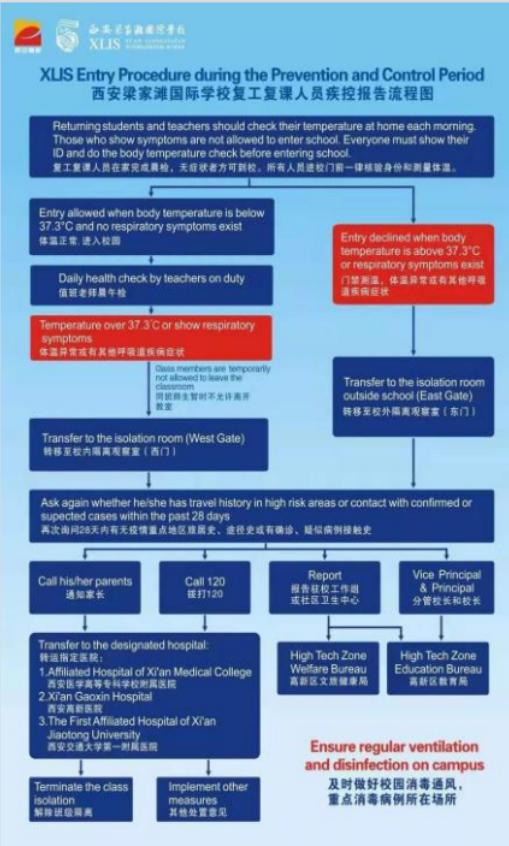

Health records

XLIS implemented higher-level regulations on returning to school

2. Establish a school epidemic prevention and control support team and improve the campus epidemic prevention and control methods.

Read the flow chart of the disease control report of school reopening in Xi'an Liangjiatan International School, which can help you understand the process of XLIS community members entering the campus upon arrival, as well as the school's triage control and school's reporting procedure for patients with fever.

3. Supervision and strict management-inspection

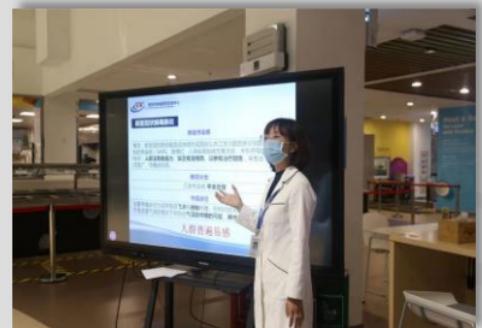

The school's epidemic prevention procedures and prevention and control measures completed, and received guidance and passed multiple joint inspections from relevant government departments

4.Epidemic prevention and control measures, and the safety of campus health and epidemic prevention.

In order to ensure the absolutely safety and health of XLIS community members, the school will carry out strict campus disinfection measures on a regular basis and a strict standard of epidemic prevention and control work needs to continue.

4.Epidemic prevention and control measures, and the safety of campus health and epidemic prevention.

In order to ensure the absolutely safety and health of XLIS community members, the school will carry out strict campus disinfection measures on a regular basis and a strict standard of epidemic prevention and control work needs to continue.

5.Waiting for the healthy return of all teachers and students stranded abroad

XLIS has successively supported the return of teachers and their families. Our school strictly follows the procedures set by the government for the returning of all overseas personnel, to ensure a healthy and safe life in Xi'an and the XLIS community.
